

Uniform Heating. Precision Quenching.

Thermatool® Quench and Temper Lines feature Solid State Induction power supplies and a patented high technology modular PrecisionSlot™ Quench. Thermatool® Quench and Temper lines utilize SmartHeat™ closed-loop temperature control to provide industry-leading process control capabilities, recipe storage and retrieval, and in-process data logging. Backed by in-depth process and materials knowledge, Thermatool® Quench and Temper lines are able to meet demanding application requirements for API® products and proprietary grades of tube, pipe and bar in lengths over 2.4 m (8 ft.).
