

Continuous Production Cutting.

Savage Saws Are Your Best Solution for cutting specialty alloys, titanium, stainless steel, hardened bars, shapes, and plates in a high-performance environment. Each Savage Saw precision cutting machine is designed for shortest cycle times, while cutting the world's most difficult alloys. Robust material handling and proprietary spindle design positions Savage Saws on the cutting edge of fast, precise performance. In lean manufacturing environments, Savage Saws serve highly automated industries - including aerospace, automotive, structural and super alloy markets.
